

Update on Coronavirus Preparedness

With the evolving status of COVID-19, we want to keep our clients and partners informed on the actions we are taking at Driehaus Capital Management. Our priority is the health and well-being of our clients and employees. Therefore, we have implemented a mandatory work from home policy for all employees effective Monday, March 16th through Thursday, April 30th. We are monitoring the situation daily and taking guidance from the Centers for Disease Control and Prevention (CDC), World Health Organization and local public health departments.

We are confident in our business continuity plan, which we have tested thoroughly. All employees have the ability to work from home and remain fully operational.

We remain focused on delivering exceptional performance for our clients and we will continue to provide updates on any new developments.
