Data as of December 31, 2022

The performance data represents the strategy's composite of event driven accounts managed by Driehaus Capital Management LLC (DCM). These returns are estimated for the period as the underlying accounts' data is yet to be reconciled to the custodian bank. Net of fee returns reflect the payment of advisory fees and in some instances, other fees and expenses such as administrative and custodian fees while the gross of fee returns do not. Both are net of brokerage commissions charged to the accounts and reflect the reinvestment of income and other earnings. The performance data shown above represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance data quoted.

¹The Driehaus Event Driven Strategy has an inception date of 2/1/13. ²Composite assets include those accounts that meet the composite objectives and eligibility requirements. Please see the notes at the end of this document for additional information. ³Since inception (2/1/13).

Investment Philosophy

- Corporate events and special situations such as M&A, spin-offs, restructurings and complex business models – create market inefficiencies and provide a consistent source of attractively mispriced securities, across the capital structure.
- In-depth, fundamental research and the ability to invest globally and across companies' capital structures offers opportunities to identify superior risk-adjusted investments.
- Investing in highly liquid securities promotes nimbleness and helps mitigate risk.

The Driehaus Event Driven Strategy seeks to provide:

- Superior risk-adjusted returns
- Consistently strong alpha with minimized beta
- Low volatility and correlation to major asset classes
- Absolute Returns with low market exposure

Driehaus Event Driven Strategy

Strategy Information

Types of events in which the strategy frequently invests include:

Bond Catalyst Driven

Event-driven trades that are expressed predominately through bond positions.

Deep Value

Trade that attempts to capture the mispricing of an extremely undervalued security.

Equity Catalyst Driven

Event-driven trades that are expressed predominately through equity positions.

Portfolio Hedge

A hedge to an unwanted factor exposure, such as equity, volatility, credit or interest rate risk.

Risk Arbitrage

Trades that attempt to capture a valuation discrepancy between similar securities.

¹The Global Industry Classification Standard (GICS), a collaboration between Standard & Poor's and Morgan Stanley Capital International, is a system of classification that identifies a company according to its business activity.

²The Other Industry Sector data is not categorized within the GICS classification system.

³Region exposure is based on country of domicile.

Notes // Driehaus Event Driven Strategy

FIRM DEFINITION

Driehaus Capital Management LLC (DCM) is a registered investment adviser with the United States Securities and Exchange Commission (SEC). DCM provides investment advisory services using growth equity and credit strategies to individuals, organizations, and institutions. The firm consists of all accounts managed by DCM (the Company).

DCM claims compliance with the Global Investment Performance Standards (GIPS®).

COMPOSITE DESCRIPTION

The Driehaus Event Driven Composite was created in February 2013. The strategy seeks investment opportunities where a catalyst has been identified that is expected to occur within the near to intermediate term, generally within 12 months, to unlock the value embedded in the investment opportunity. Trades will often center on corporate events, such as earnings, product cycles, restructurings, corporate actions, market dislocations or portfolio hedges.

Accounts in the Composite may also hold derivative instruments, including swaps, options, futures and forwards that provide long and short exposures to debt securities, equity securities and currencies. Derivatives may be used to manage interest rate and currency risk, as part of a hedging strategy and/or to replicate outright long and short exposures.

PERFORMANCE RESULTS

Net of fee returns reflect the payment of advisory fees and in some instances, other fees and expenses such as administrative and custodian fees while the gross of fee returns do not. Both are net of brokerage commissions charged to the accounts and reflect the reinvestment of income and other earnings.

Valuations and returns are computed and stated in U.S. dollars. Returns are presented on a pretax basis.

Past performance is not indicative of future results. All investments have risks and you could lose money.

Additional information regarding policies for valuing Investments, calculating performance, and preparing GIPS Reports are available upon request. A list of composite descriptions and a list of broad distribution pooled funds are also available upon request. INDICES

The S&P 500® Index consists of 500 stocks chosen for market size, liquidity and industry group. It is a market-weighted index, with each stock's weight in the index proportionate to its market value.

The FTSE 3-Month T-Bill Index is designed to mirror the performance of the 3-month U.S. Treasury Bill. The FTSE 3-Month T-Bill Index is unmanaged and its returns reflect reinvestment of all distributions and changes in market prices.

The most recent annual GIPS Report is available [here](#).

TERMS

Beta: A measure describing the relation of a portfolio's returns with that of the financial market as a whole. **Effective Duration:** Duration calculation for bonds with embedded options. Effective duration takes into account that expected cash flows will fluctuate as interest rates change. **Spread Duration:** The sensitivity of the price of a bond to a 100 basis point change to its option-adjusted spread. **Sharpe Ratio:** Calculated by finding the portfolio's excess return and then dividing by the portfolio's standard deviation.
